Eating disorders (ED) are serious and long-lasting mental disorders that mainly affect women. They begin in adolescence or early adulthood and are multi-causal, involving psychological, biological, and socio-cultural factors. Their incidence has increased in recent years, particularly as a result of lockdown, as has their clinical complexity. Because of all this and the limited results of current therapeutic approaches, there is a tendency towards chronicity in patients who are more resistant to usual treatment. This conference will bring together some of the most relevant international speakers in the field, who will provide updates on clinical and therapeutic aspects and the factors involved in ED. We will also discuss the management of enduring ED patients.

Program

8:30 h Opening.

9:00 h Symposium 1/ Risk factors and clinical-diagnostic features:

Chair: *Susana Jimenez-Murcia*

Department of Clinical Psychology,
University Hospital Bellvitge-IDIBELL and
University of Barcelona (Spain).

Genetic and intergenerational risks in
Eating Disorders.

Nadia Micali

Copenhagen University (Denmark).

Severe enduring AN and models of
maintenance.

Janet Treasure

King's College University London (UK).

Diagnostic and Severity Criteria in Adult
Eating Disorders.

Angela Favaro

Padova University (Italy).

How we manage comorbidity with
autism in ED.

Kate Tchanturia

King's College University London (UK).

10:30 h Break

11:00 h Symposium 2/ State of the Art on
Management of ED and Predictors.

Chair: *Mimi Israel*

McGill University, Montreal (Canada).

Updates on the Management of Adult
Eating Disorders and limitations.

Alessio M Monteleone

Naples University (Italy).

Predictors of therapy outcome in
Eating Disorders.

Stephan Zipfel

University of Tübingen (Germany).

Novel Approaches in Children and
Adolescents with Eating Disorders.

Daniel Le Grange

The University of California at San Francisco (USA).

Viennese Model of Treating Adolescent
Anorexia nervosa along the New Maudsley
Model
